

1. Write a C program to display a message “Hello World” to the output screen.
2. Write a C program to add, subtract, multiply and divide 2 numbers taking user input.
3. Write a C program to calculate the area of a rectangle taking user input.
4. Write a C program to calculate the area of a triangle taking user input.
5. Write a C program to calculate the area of a circle taking user input.
6. Write a C program to convert temperature from Fahrenheit to Celsius taking user input.
7. Write a C program to swap 2 numbers using 3rd variable (taking user input).
8. Write a C program to swap 2 numbers without using 3rd variable (taking user input).
9. Write a C program to check whether a number is positive or negative (The number should be taken as user input).
10. Write a C program to find the greater of two numbers(taking user input).
11. Write a C program to find the smaller of two numbers (taking user input).
12. Write a C program to check whether a number is even or odd (taking user input).
13. Write a C program to calculate the amount of profit or loss taking the cost price and selling price as user input.
14. Write a C program to check whether a number is even or odd using ternary operators.
15. Write a C program to find the greater of 2 numbers using ternary operators.
16. Write a C program to calculate the amount of profit or loss using ternary operators(cost price and selling price should be taken as user input).
